 Governing Board Minutes of Meeting #43
 STF Governing Board Project 2026-02-27
 2026-04-16

1. Purpose and Scope

2. Guiding Principles

2.1.- Openness

2.2.- Transparency

2.2.- Collaboration

2.3.- Inclusive Meritocracy

2.4.- Consensus Decision-Making

2.5.- Responsible Oversight

3. Work-streams Overview and Goals

3.1 Governance: goals

3.2 Awareness and Content: goals

3.3 Tooling: goals

3.4 Ecosystem: goals

3.5 STF Programs: goals

4 Actions

4.1 Work-stream: Governance

4.1.1 Goal: Operationalise the financial governance

4.1.2 Goal: Operationalise the Governing Board

4.1.3 Goal: Develop the governance skeleton

4.1.4 Goal: Operationalize the governance skeleton

4.2 Work-stream: Awareness and Content

4.2.1 Goal: Promote STF projects and services

4.2.2 Goal: Move content to GitHub

4.2.3 Goal: Promote our participation in third party projects

4.2.4 Goal: Website up-to-date

4.3 Work-stream: Tooling

4.3.1 Goal: Consolidate GitHub as collaboration tool

4.4 Work-stream: Ecosystem

4.4.1 Goal: Consolidate the current family of apps members

4.4.2 Goal: Increase the number of family apps members

4.4.3 Goal: Increase the number of Members

4.4.4 Goal: Join 3rd parties ecosystems

4.5 Work-stream: Programs

4.5.1 Goal: Create the OSS Program

4.5.2 Goal: Create the open data program

4.5.3 Goal: Create the service program

4.5.4 Goal: Continue the Research Program

4.5.5 Goal: Consolidate the existing collaboration with third party projects

4. Deliverables and Outputs

Deliverable Types

5. KPIs and Reporting

Ecosystem growth

Programs

6. Risks and Mitigation

Risk 1 - Revenue concentration and insufficient membership growth

Risk 2 — Incomplete policy framework blocking project hosting and signaling immaturity

7. Approval and Governance

This is the STF Action Plan 2026. STF's Action Plans define how to achieve the strategic Goals defined in the STF Strategic Plan.

In this case, since the STF Strategic Plan 2026-2029 has not been created and approved yet, this Action Plan might be upgraded throughout the year to adapt to the Strategic Plan, once approved.

1. Purpose and Scope

This Action Plan 2026 is one of the Governance Documents described at the STF Charter. The main objectives of the Action Plan:

- Define STF priorities for 2026
- Align activities with STF mission and strategic goals
- Serve as a reference for execution and reporting

The document includes a description of the main:

- Work-streams
- Goals of each work-streams
- Actions planned for each work-stream, structured by goals
- Most relevant deliverables and kpis associated to the activity of the Foundation.

It also includes a visualization of the Actions to make the comprehension and discussion of the STF Action Plan 2026 easier.

2. Guiding Principles

These are the guiding principles for STF's 2026 activity, which are extracted from the  STF_Programs_and_Projects_Governance_v0_5_1.pdf

2.1.- Openness

STF adopts openness as a foundational governance principle. STF refers to the implementation of this governance principle as open-by-default.

All discussions, decisions, processes, documentation, services, code and data must be accessible to the public unless clearly restricted for legal or security reasons, which must be justified, logged, and reviewed periodically by the STF Steering Committee.

Decisions at every level must be made through open, traceable processes. This includes publicly posting meeting agendas, code and data reviews, outcomes, and

relevant materials. Voting records, rationale for decisions, approvals, and governance discussions must be logged in accessible channels.

Participation must be inclusive and barrier-free. Any individual or organization willing to follow STF's code of conduct and policies is welcome to propose ideas, join discussions, and contribute to STF programs and projects.

2.2.- Transparency

STF adopts transparency as a foundational governance principle. Transparency ensures STF governance is visible, understandable, and fosters trust across the STF Community, Ecosystem, and the public.

All proposals, governance discussions and decisions must be documented and made available through official channels. This includes publishing and keeping accessible records of agendas, minutes, resolutions, relevant background materials, road-maps, designs, SLAs, etc.

Documentation standards will be outlined for all governance processes, mandating comprehensive and publicly accessible records. Reporting mechanisms will be established for regular program and projects status updates and policy adherence, ensuring accountability to the STF Steering Committee, the STF Community, STF Ecosystem and public.

2.2.- Collaboration

STF adopts collaboration as a foundational governance principle. Collaboration means working openly and respectfully within the STF Community, based on merit and shared goals, fostering a diverse and active community where participants are encouraged to take initiative. It emphasizes clear communication, active engagement and inclusive participation in a transparent environment.

Development takes place in public forums using open tools, ensuring openness and transparency. Leadership and influence emerge from active, consistent participation.

Well-defined contribution policies guide how data and code is submitted, reviewed, and accepted. This structured, open approach ensures sustainable growth, shared responsibility, and ongoing community engagement across STF Programs and Projects.

2.3.- Inclusive Meritocracy

STF adopts inclusive meritocracy as a foundational governance principle. Meritocracy means that influence is earned through consistent, high-quality contributions across STF Programs.

All contributions are evaluated on technical merit, not affiliation or seniority. STF Community members earn trust through consistent participation, technical or

strategic input, and community engagement.

STF recognizes and rewards sustained, high-quality contributions with increasing responsibility and influence. Advancement to roles such as Maintainer or Program Committee Member is based on demonstrated merit and earned trust by peers.

Meritocracy coexists with inclusiveness: all contributors are evaluated by the same criteria, and STF actively works to remove barriers that may prevent individuals from demonstrating their capabilities, ensuring opportunities are accessible to all and fostering broad and diverse community talent.

2.4.- Consensus Decision-Making

STF adopts consensus decision-making as a foundational governance principle. STF prioritizes consensus among ecosystem and community members to guide decisions at all levels of governance.

Consensus is defined as broad agreement with no strong objections, reached through open discussion and respectful engagement. It is the preferred approach for both technical and strategic decisions, as defined by STF Charter.

Time frames for reaching consensus are established to balance thoughtful deliberation with the need for timely progress. When consensus cannot be reached within a defined period, structured voting may be used.

Voting thresholds are based on the significance of the decision, with critical matters requiring super majority approval. When this super majority cannot be reached, the situation will be escalated to a different governance body, that will support the process through coaching first. Only if the conflict persists, this governance body will resolve it, following a specific policy.

2.5.- Responsible Oversight

STF adopts consensus responsible oversight as a foundational governance principle. Responsible Oversight ensures that all programs and projects align with STF principles and goals.

STF Governance Bodies are accountable for ensuring programs and projects operate effectively, transparently, and in alignment with STF's mission. Therefore, they are entitled to conduct regular reviews of program health, policy compliance, and progress against goals. These reviews are documented and feed into annual planning and decision-making at Steering Committee level.

When issues arise—such as inactivity, governance breakdown, or policy violations—STF Steering Committee has defined procedures for intervention, including corrective actions or restructuring.

3. Work-streams Overview and Goals

The main work-streams for 2026 are:

1. Governance: establishes the financial, operational, and policy foundations that allow STF to function as a credible and sustainable open source foundation.
2. Awareness and content: increases the visibility of STF, its projects, and its community through targeted communications, event participation, and the organisation of public-facing content. It also ensures that all materials are accessible and up to date.
3. Tooling: consolidates the set of collaboration tools used by STF to reduce friction, improve traceability, and align with open source best practices.
4. Ecosystem: grows and strengthens the network of members, partner applications, and third-party organisations that form the STF community.
5. Programs: delivers the technical and research output of STF by creating and hosting open source software projects, open datasets, and services, while also advancing STF's participation in relevant external initiatives.

3.1 Governance: goals

1. Operationalise the financial governance: put in place the budgeting and reporting processes needed to manage STF's finances transparently and responsibly throughout the year.
2. Operationalise the Governing Board: enable the STF Governing Board to function effectively.
3. Develop the governance skeleton: create the set of foundational policies that STF needs to operate with legal clarity and credibility.
4. Operationalize the governance skeleton: move from approved policies to active practice by integrating them into day-to-day workflows, tooling, and governance bodies.

3.2 Awareness and Content: goals

1. Promote STF projects and services: increase awareness of STF's technical offerings and community initiatives to relevant audiences.
2. Move content to GitHub: migrate STF's documentation and promotional materials to versioned public repositories, improving accessibility, traceability, and contributor friendliness.

3.3 Tooling: goals

- Consolidate GitHub as primary collaboration tool: centralise STF's community collaboration on GitHub, ensuring consistency and taking advantage of nonprofit benefits available on the platform.

3.4 Ecosystem: goals

1. Consolidate the current family of apps members: verify and formalise the participation of existing member applications.
2. Increase the number of family apps members: identify and onboard new tools and applications that complement the osskb.org ecosystem, expanding its value for all members.
3. Increase the number of Members: grow the STF membership base providing a clear and compelling value proposition for joining.
4. Join 3rd parties ecosystems: establish STF's presence in relevant open source and open data organisations, building credibility and creating opportunities for collaboration and co-promotion.

3.5 STF Programs: goals

- Create the OSS Program: launch and structure STF's first open source software hosting programme, providing governance, infrastructure, and support for projects hosted under the STF umbrella.
- Create the open data program: establish a programme for hosting and stewarding open datasets.
- Create the service program: define and operate the set of services STF provides to its members and the wider community.
- Continue the Research Program: sustain STF's commitment to applied research by producing and publishing peer-reviewed papers.
- Consolidate the existing collaboration with third party projects: formalise STF's participation in key external initiatives, turning informal involvement into structured, mutually beneficial membership.

4 Actions

4.1 Work-stream: Governance

4.1.1 Goal: Operationalise the financial governance

- 2026Q1
 - Create and approve STF 2026 Budget
 - Prepare a comprehensive resource plan from program inputs; model scenarios and allocations
 - Review with stakeholders, incorporate feedback, and finalize
 - Submit for board approval; record approval and publish the budget baseline

- **2026Q2**
 - **Create 2026Q1 quarterly financial report**
 - Aggregate and reconcile Q1 income and costs; compare actuals to budget baseline
 - Explain drivers of variances and provide narrative insights
 - Recommend corrective actions and next-quarter adjustments
 - **Create the 2025 Annual Expenses Report**
 - Gather, categorize, and validate prior-year expenses; produce the annual summary with totals
 - Break down spending by program and cost type; include charts or tables
 - Highlight year-over-year trends; archive and share the report
- **2026Q3**
 - **Create 2026Q2 quarterly financial report**
 - Consolidate Q2 revenue and cost data; compare to budget and forecast
 - Identify trends, risks, opportunities, and seasonality impacts
 - Record corrective actions and decisions; track completion into Q3
- **2026Q4**
 - **Create 2026Q3 quarterly financial report**
 - Compile and validate Q3 results; analyze variances versus plan and prior quarters
 - Include concise charts and commentary summarizing key insights
 - Log finance risks and mitigations; prepare inputs for year-end planning

4.1.2 Goal: Operationalise the Governing Board

- **2026Q1**
 - **Define and Approve the 2026 Annual Action Plan**
 - Confirm roadmap with milestones, named owners, dependencies, and metrics
 - Run a review cadence to track progress, escalate blockers, adjust scope/timelines, and publish status updates
- **2026Q2**
 - **Define and approve the 2026-2028 Strategic Plan**

- Draft multi-year goals and success metrics; align priorities across programs
- Gather stakeholder input via reviews/workshops; incorporate feedback
- Present for board approval; publish the adopted strategy and next steps
- 2026Q3 — None
- 2026Q4 — None

4.1.3 Goal: Develop the governance skeleton

- 2026Q1 — None
- 2026Q2
 - **Create and approve Intellectual Property Policy**
 - Define IP ownership/usage rules with scope, definitions, and compliance expectations
 - Publish the approved policy and specify applicability across code, content, and artifacts
- 2026Q3
 - **Create and approve Licensing Compliance Policy**
 - Set standards and procedures for license compliance, including monitoring and evidence collection
 - Define escalation paths and remediation steps
 - **Create and approve the Release Policy**
 - Define release criteria, gating steps, and required sign-offs with clear accountability
 - Document quality gates and verification requirements across teams and tools
 - Require auditable records and version history; link releases to compliance and risk checks
- 2026Q4
 - **Create and approve the Election Policy**
 - Set fair election rules covering eligibility, candidacy, voting mechanisms, and confidentiality
 - Publish nomination and voting timelines
 - Define oversight roles and auditing provisions

4.1.4 Goal: Operationalize the governance skeleton

- 2026Q1 — None
 - 2026Q2
 - **Implement the Contribution Policy processes**
 - Operate contribution intake, review, and management
 - Use defined submission forms, templates, and review checklists with recorded outcomes
 - Maintain communication loops with contributors
 - 2026Q3
 - **Implement the IP policy**
 - Integrate IP policy checks into workflows; provide guidance and training
 - Monitor adherence with metrics; flag exceptions and execute remediation
 - Document resolutions and continuously improve compliance
 - 2026Q4
 - **Implement the Release policy**
 - Apply release criteria and gating steps; collect required sign-offs
 - Integrate policy into CI/CD with checklists to ensure consistent, repeatable processes
 - Store artifacts, approvals, and evidence; ensure version traceability
 - **Kick-off the Programs Steering Committee**
 - Confirm charter, scope, decision rights, and initial membership
 - Schedule recurring meetings; create and prioritize the shared backlog
 - Track cross-program impacts and risks; facilitate decisions and document outcomes
-

4.2 Work-stream: Awareness and Content

4.2.1 Goal: Promote STF projects and services

- 2026Q1
 - **Promote osskb.org at Open Source Week 2026**
 - Present and engage to expand reach through session proposals

and community interactions

- Prepare and distribute shareable materials
- Follow up with contacts made and track outcomes
- **Promote osskb-core at OpenChain Tooling Group**
 - Advocate adoption within compliance tooling forums via demos and feedback loops
 - Facilitate collaborative discussions and gather input
 - Track adoption and integration progress
- **osskb.org apps family on our website**
 - Publish a showcase page of integrated apps with up-to-date list and descriptions
 - Include links to documentation and repos for each app
 - Maintain and refresh content regularly
- **2026Q2**
 - **Create and publish a blog about STF's activity**
 - Regularly post updates, wins, and insights with a content plan and review process
 - Establish a publishing cadence and assign authorship
 - Promote posts and track engagement
 - **Promote our apps family**
 - Run campaigns across relevant channels with demos and case studies
 - Target specific audiences to drive awareness and adoption
 - Measure campaign effectiveness and iterate
 - **Promote our participation at SPDX**
 - Share updates and results through SPDX channels (meetings, mailing lists, repository updates)
 - Keep stakeholders informed of contributions and outcomes
 - Build visibility and credibility within SPDX community
- **2026Q3**
 - **Promote osskb.org at OSS EU 2026**
 - Showcase initiatives to the EU audience with speaking opportunities and networking
 - Conduct partner outreach before, during, and after the event

- Measure reach and follow up on leads
- 2026Q4 — *(action to be defined)*

4.2.2 Goal: Move content to GitHub

- 2026Q1 — None
- 2026Q2
 - **Move content from Web to GitHub**
 - Shift web docs into versioned repositories while preserving history
 - Update links across all properties and archive superseded pages
 - Communicate the change to users and contributors
- 2026Q3
 - **Add STF promo material to GitHub**
 - Publish mission, overviews, and visuals in repos with consistent branding
 - Create a simple media kit for reuse
 - Ensure materials are accessible and well-organized
- 2026Q4 — None

4.2.3 Goal: Promote our participation in third party projects

- 2026Q1
 - **Promote our participation at SPDX**
 - Share updates and results through SPDX channels (meetings, mailing lists, repository updates)
 - Keep stakeholders informed of contributions and outcomes
 - Build visibility and credibility within SPDX community
- 2026Q2
 - **Promote our participation at SPDX**
 - Share updates and results through SPDX channels (meetings, mailing lists, repository updates)
 - Keep stakeholders informed of contributions and outcomes
 - Build visibility and credibility within SPDX community
- 2026Q3
 - **Promote our participation at SPDX**
 - Share updates and results through SPDX channels (meetings, mailing lists, repository updates)

- Keep stakeholders informed of contributions and outcomes
 - Build visibility and credibility within SPDX community
- 2026Q4
 - **Promote our participation at SPDX**
 - Share updates and results through SPDX channels (meetings, mailing lists, repository updates)
 - Keep stakeholders informed of contributions and outcomes
 - Build visibility and credibility within SPDX community

4.2.4 Goal: Website up-to-date

- 2026Q1
 - **Adapt the osskb.org content on the website**
 - Align messaging and branding to osskb.org with refreshed copy, visuals, and navigation
 - Ensure the transition is reflected consistently across the site
 - Gather feedback and iterate on content
 - 2026Q2
 - **Reflect the correct status of the Gov. Board and Membership**
 - Display current governance and members with verified updates
 - Establish a process for maintaining accuracy going forward
 - Review and refresh regularly
 - **osskb.org apps family on our website**
 - Publish a showcase page of integrated apps with up-to-date list and descriptions
 - Include links to documentation and repos for each app
 - Maintain and refresh content regularly
 - 2026Q3
 - **Add information about the integration with osskb.org on GitHub**
 - Document integration patterns and examples with step-by-step guides
 - Publish sample repositories demonstrating integration
 - Keep documentation current and easy to find
 - 2026Q4 — None
-

4.3 Work-stream: Tooling

4.3.1 Goal: Consolidate GitHub as collaboration tool

- 2026Q1 — None
 - 2026Q2
 - **Register at GitHub as non-profit**
 - Submit required documentation to obtain nonprofit benefits and features
 - Complete validation steps and track approval
 - Activate nonprofit features once approved
 - 2026Q3 — None
 - 2026Q4 — None
-

4.4 Work-stream: Ecosystem

4.4.1 Goal: Consolidate the current family of apps members

- 2026Q1
 - **Consolidate the current Members for 2026**
 - Verify membership eligibility and active participation
 - Record role expectations and time/resource/financial commitments
 - Produce and distribute the official roster; map members to bodies and track attendance
- 2026Q2
 - **Invite our current apps to join us as Community Members**
 - Convert partners into community members by highlighting benefits
 - Offer a simple, transparent process for joining
 - Track conversions and onboard new community members
- 2026Q3
 - **Branding: from SCANOSS to osskb.org**
 - Execute the brand transition across assets with updated visuals, messaging, and redirects
 - Communicate changes to stakeholders clearly and consistently
 - Monitor adoption and address any confusion or issues
- 2026Q4

- **Create a communication channel with each one of the application leaders**
 - Set up direct contacts for coordination with designated channels
 - Establish a regular cadence for check-ins and updates
 - Document key discussions and action items

4.4.2 Goal: Increase the number of family apps members

- **2026Q1**
 - **Identify new potential tooling to join the osskb.org apps family**
 - Evaluate candidate tools for value and fit using discovery and an assessment rubric
 - Run pilot integrations to test compatibility and value
 - Document evaluation results and make go/no-go decisions
- **2026Q2**
 - **Create a plan with SCANOSS to promote additional integrations**
 - Co-develop a roadmap to expand integrations with joint milestones and responsibilities
 - Define a delivery timeline and assign owners
 - Track progress and adjust the plan as needed
- **2026Q3 — None**
- **2026Q4 — None**

4.4.3 Goal: Increase the number of Members

- **2026Q1**
 - **Identify new potential members: prospects**
 - Build and nurture a target pipeline through research and segmentation
 - Maintain consistent follow-up tracking
 - Qualify prospects and prioritize outreach
- **2026Q2**
 - **Create a transparent tracking system at AnyType for the Governing Board to follow this activity**
 - Implement an accessible, real-time governance dashboard with defined data sources and permissions
 - Establish update rhythms and ensure data quality

- Train users and gather feedback for improvements
- 2026Q3
 - **Membership campaign**
 - Execute coordinated outreach and conversion activities with defined messaging and timeline
 - Set and track metrics to measure effectiveness
 - Iterate based on results and feedback
- 2026Q4 — None

4.4.4 Goal: Join 3rd parties ecosystems

- 2026Q1
 - **Identify contacts and process to join their ecosystems**
 - Map stakeholders and entry requirements for target ecosystems
 - Execute an outreach and compliance plan to join effectively
 - Document processes and maintain contact lists
- 2026Q2
 - **Join open source and open data organizations and projects**
 - Enroll in relevant groups throughout the year with a prioritized approach
 - Align efforts and define contribution plans for each
 - Track memberships and participation
 - Add logos to websites
- 2026Q3
 - **Join open source and open data organizations and projects**
 - Enroll in relevant groups throughout the year with a prioritized approach
 - Align efforts and define contribution plans for each
 - Track memberships and participation
 - Add logos to websites
- 2026Q4
 - **Join open source and open data organizations and projects**
 - Enroll in relevant groups throughout the year with a prioritized approach
 - Align efforts and define contribution plans for each

- Track memberships and participation
 - Add logos to websites
-

4.5 Work-stream: Programs

4.5.1 Goal: Create the OSS Program

- 2026Q1 — None
- 2026Q2
 - **Consolidate stf-plagichack**
 - Harden, document, and support the tool in production
 - Integrate with CI, set up issue tracking, and create comprehensive user guides
 - Monitor usage and gather feedback for improvements
- 2026Q3
 - **Host a second software project**
 - Onboard and run another open source codebase with appropriate infrastructure
 - Assign maintainers and align governance
 - Monitor project health and community engagement
- 2026Q4
 - **Create the oss governance document**
 - Codify OSS Program governance within STF, detailing roles and processes
 - Include decision-making guidelines for contributors and maintainers
 - Publish and socialize the document

4.5.2 Goal: Create the open data program

- 2026Q1 — None
- 2026Q2
 - **Host purl2cpe**
 - Deploy and operate the purl2cpe service with reliable infrastructure and monitoring
 - Provide clear usage guidance and documentation
 - Track service health and user adoption

- **2026Q3**
 - **Host crypto-algorithm-open-dataset**
 - Serve the dataset openly with reliable uptime, versioning, and metadata
 - Provide accessible download/API options
 - Track usage and maintain data quality
- **2026Q4**
 - **Create the open data governance document**
 - Define policies for data stewardship, including licensing, quality controls, and access rules
 - Document update procedures and responsibilities
 - Publish and implement the governance framework

4.5.3 Goal: Create the service program

- **2026Q1**
 - **Approve new limits**
 - Review and adjust service access thresholds based on current usage and capacity
 - Document and communicate updated limits to affected stakeholders
 - Monitor impact after the change
- **2026Q2**
 - **api key for GHA users**
 - Provide authenticated access for GitHub Actions users with secure provisioning
 - Implement rotation policies, usage limits, and supporting docs
 - Monitor usage and maintain security controls
- **2026Q3 — None**
- **2026Q4 — None**

4.5.4 Goal: Continue the Research Program

- **2026Q1 — None**
- **2026Q2 — None**
- **2026Q3 — None**
- **2026Q4**

- **Publish a research paper in 2026**
 - Select a topic, draft, and submit to appropriate venues for peer review
 - Promote the published result through relevant channels
 - Track citations and impact

4.5.5 Goal: Consolidate the existing collaboration with third party projects

- **2026Q1**
 - **Join SPDX as Member**
 - Complete membership application and approval process
 - Onboard to working groups and governance bodies
 - Participate formally and contribute actively
 - **2026Q2**
 - **Invite SPDX as Community Member**
 - Propose SPDX joining STF's community through a formal invitation
 - Outline mutual benefits and collaboration opportunities
 - Follow up and facilitate onboarding if accepted
 - **2026Q3 — None**
 - **2026Q4 — None**
-

4. Deliverables and Outputs

This section lists the main tangible outputs expected from the STF 2026 Action Plan, organised by type and work-stream.

Cod e	Deliverable	Type	Work-stream	Expected
D1	STF 2026 Budget	Document	Governance	2026Q1
D2	STF Action Plan 2026	Document	Governance	2026Q1
D3	2025 Annual Expenses Report	Report	Governance	2026Q2
D4	2026–2028 Strategic Plan	Document	Governance	2026Q2
D5	2026Q1 Quarterly Financial Report	Report	Governance	2026Q2
D6	2026Q2 Quarterly Financial Report	Report	Governance	2026Q3
D7	2026Q3 Quarterly Financial Report	Report	Governance	2026Q4
D8	IP Policy	Document	Governance	2026Q2
D9	Licensing Policy	Document	Governance	2026Q3
D10	Release Policy	Document	Governance	2026Q2
D11	Compliance Policy	Document	Governance	2026Q2
D12	Election Policy	Document	Governance	2026Q2
D13	OSS Governance Document	Document	Programs	2026Q4
D14	Open Data Governance Document	Document	Programs	2026Q4
D15	Second OSS software project	Repository	Programs	2026Q3
D16	purl2cpe dataset	Repository	Programs	2026Q2
D17	cryptographic-algorithm-open-dataset	Repository	Programs	2026Q2
D18	Research paper 2026	Report	Programs	2026Q4
D19	osskb.org apps family page	Document	Awareness & Content	2026Q1
D20	STF blog	Report	Awareness &	2026Q2

Deliverable Types			Content	
	D21	STF promo material	Repository	Awareness & Content
				2026Q3
Type	Description			
Document	Formal written artifact such as a policy, governance text, plan, specification or web page, approved and published by STF.			
Report	Periodic or one-off narrative output summarising activity, finances, research findings or operational results.			
Repository	Publicly accessible version-controlled code or data repository hosted on GitHub or equivalent platform.			

5. KPIs and Reporting

The STF Action Plan 2026 will be reviewed quarterly by the Governing Board, using the Quarterly Activity Report and the Financial Expenses Report as the basis of the discussion, as stated in the STF Charter.

The following KPIs have been defined to track progress against the 2026 goals:

Ecosystem growth

- New members: 1 new member per quarter (4 total by end of 2026)
- Open source organizations joined: 5 by end of 2026

Programs

- New open data projects hosted: 3 by end of 2026
- New software projects hosted: 3 by end of 2026

These KPIs will be reported and discussed at each quarterly Governing Board meeting. Progress will be tracked cumulatively across quarters.

- Indicator
- Measurement method
- Reporting frequency

6. Risks and Mitigation

Risk 1 - Revenue concentration and insufficient membership growth

STF financial sustainability is highly sensitive to membership composition. With fees ranging from €0 to €30,000, revenue should depend on a high number of members.

Not increasing the number of Members would mean that STF would not be able to grow.

The osskb.org service — the core technical benefit for all STF members — is fully dependent on SCANOSS. Any change in SCANOSS's strategy, finances, or relationship with the foundation would directly compromise the value proposition of every membership class, with no fallback available.

Any plan of increasing STF's value proposition relies on getting the resources to provide the osskb.org service.

Mitigation actions:

- Define and track a membership pipeline with quarterly targets by class, reviewed by the Governing Board.
- Strengthen the value proposition for Bronze and Silver members to build a more resilient base.
- Establish a renewal early-warning process to identify and address churn risk before annual deadlines.

Risk 2 — Incomplete policy framework blocking project hosting and signaling immaturity

Several critical policies — IP, Licensing Compliance, Release, and Election — are still pending in early 2026. Without them, STF assumes higher risks when accepting contributions, as the Contribution Policy explicitly requires IP and licensing compliance. Organizations evaluating STF as a home for their projects might also treat these gaps as a signal of governance immaturity.

- Treat the policy creation schedule as a critical path, with clear ownership and Governing Board visibility.
- Prioritize the IP Policy and Code of Conduct, as they are the minimum requirement to accept any contribution.
- Publish the policy roadmap so prospective members and contributors can plan their engagement with confidence

7. Approval and Governance

- The STF Action Plan, as stated in STF Charter, will be approved by the Governing Board and published, together with the STF Budget
- The Action Plan will be reviewed every quarter by the STF Governing Board, using the Quarterly Activity Report and the Financial Expenses Report as the basis of the discussion.
